From country 3 [name]:	Germany (25 female, 42 male)
...	
Total number of participants:	174
From total number of countries:	3

Description

Provide a short description of the event and its activities.

15th July 2022

On the guests' arriving a short visit to the car sharing station took place, where the details were explained and a first exchange of ideas how to avoid CO2 emissions ensued.

16th July 2022

Visit to the photovoltaic system. Then the participants from the partner communities gathered with their German hosts in the Willy-Dieterle-Halle to view the results of the questionnaires on the topics of energy, agriculture, water, traffic, and recycling. The data had been collected two months before the event took place in Jettingen.

Via PowerPoint everybody could see the different approaches in the various communities in their own language explained and commented on by the Mayor of Jettingen.

Later on, the participants separated into groups to discuss the subjects and to express their own opinion on the subjects mentioned beforehand. Finally, the participants had to come to a conclusion and agree or disagree to the given proposals and strategies of how to deal with current environmental problems.

The pros and cons were collected and the numbers visualized in a prearranged PowerPoint presentation according to the already mentioned proposals and strategies. Discussions about the results concluded the meeting and were continued in small groups.

17th July 2022

An ecumenical service with all the guest and participants and additional people from the community took place in a huge marquee followed by a brass band festival with parade. It was there that the partner communities were presented with an insect hotel to promote the issue of a sustainable environment.

18th July 2022

The attending mayors and councilors informed each other about the consequences and the handling of the pandemic (T1.4) and discussed means of mutual support. A review of the activities was held. Farewell of some of the guests.
